**DETAILED ACTION**

***Response to Amendment***

1. The reply filed on 12/31/01 consists of changes to the specification, cancellation all original claims, addition of new claims 20-27 and remarks related to rejection of claims.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 20-24, drawn to a battery terminal, classified in class 439, subclass 883.
  - II. Claim 25-27, drawn to method of making a battery terminal, classified in class 29.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the battery terminal can be made using a press and a regular welding machine.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to William Collard on 1/30/01 and again on 2/5/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
